Product information, including uses/applications and source(s) of imports:

The product, ORGASOL®, consists of specialty micro-porous, ultra-fine, spherical polyamide powders of modified nylon-6, nylon-12, and nylon-6,12 copolymer. These polyamides are polymerized from the monomer for nylon-6 and nylon-12, together with other monomers, such that some of the products may comprise less than 95 percent by weight of nylon-6, nylon-12, or nylon-6,12 in the polymer matrix, respectively.³ The ORGASOL® 1000 series product line is based on nylon-6; the 2000 line, on nylon-12; and the 3000 line, on nylon-6,12. ORGASOL® powders are used in niche market areas of the cosmetics industry as a carrier of pigments and as an absorbent of oils on the skin. Personal care/cosmetics marketers also use the resins to provide products with superior texture and a “soft-to-the-touch” feel. ORGASOL® products are also used by manufacturers of industrial coatings, paints and varnishes in niche market areas to increase abrasion resistance, texturing and gloss control in UV-cured coatings. The product is imported from France.

³ According to subheading Note 1(a)(1) to HTS Chapter 39, polyamide polymers containing monomer constituents of less than 95 percent by weight of the total polymer composition, would conceptually be provided for in HTS 3908.90.70.

Technical comments:⁴

The Commission suggests that renewal of the existing duty suspension include striking the current article description of heading 9902.39.08 and inserting in lieu thereof the description shown on page 1 of this report, in order to provide a more definitive description of the chemical products involved, and to provide the CAS numbers.

⁴ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
